LinkedIn Center for Firearm Injury Prevention

Letter from the Director

Dear friends:

Thank you for your interest in the Center for Firearm Injury Prevention (C-FIP). We are delighted to share highlights from our recent work and invite your continued partnership in identifying solutions that prevent firearm-related harm and improve the health and well-being of our communities.

Ali Rowhani-Rahbar
Director

Firearm injury and violence remain among the most urgent public health and safety challenges of our time, affecting individuals, families, and neighborhoods across our nation. The consequences extend far beyond lives lost, leaving lasting physical, emotional, and social impacts on survivors and communities. Addressing this crisis requires rigorous interdisciplinary science, authentic community engagement, and effective policy innovation. At C-FIP, we are committed to bringing these elements together.

In recent years, our team has strengthened collaborations with community leaders, policymakers, and researchers at local, state, and national levels. Grounded in principles of equity and justice, we employ multilevel approaches to inform prevention, intervention, and restoration strategies across individual, interpersonal, institutional, community, and societal domains. Central to this work is our belief that the voices, strengths, and lived experiences of those most directly impacted by firearm violence must shape our research direction and the solutions that we pursue.

We are also deeply invested in preparing the next generation of scholars and practitioners who will carry this work forward. Through mentorship, training, and capacity building, C-FIP cultivates leaders who will sustain progress and drive innovation in this field for decades to come. Their passion and commitment inspire us and fuel the growing momentum for meaningful change.

Your support, engagement, and collaboration remain essential to this mission. We welcome your ideas, invite your partnership, and look forward to continuing this work together toward healthier, safer, and more just communities for all.

Highlights

With the state of Washington's financial support, we have expanded our outreach programs, enhanced community services, and invested in innovative projects that address pressing local issues. This opportunity allowed us to collaborate with community, governmental, and academic partners, sharing knowledge and resources to maximize the positive impact on communities in Washington and across the country.

From July 2023-June 2025:

67

Academic manuscripts in peer-reviewed journals

28

Features in local, state, and national news outlets

28

Community & governmental partners in Washington State

6

Member-affiliated academic institutions

63,000

Highlights

C-FIP In the Community

Building Partnerships

Our team worked with 28 community-based organizations statewide to support evaluation of their programs, identify research questions important to their communities, and conduct research that decreases the burden of firearm injury and violence statewide.

Secure Storage Events

C-FIP partnered with Public Health--Seattle & King County and Seattle Children's Hospital to evaluate community lockbox distribution programs in Tacoma, Fife, White Swan, and South Seattle. Our evaluation will determine the reach and impact of these efforts on community secure firearm storage.

Presentations & Conferences

Our team members attended 2 conferences statewide, 13 nationally, and 2 internationally to disseminate our findings to community, institutional, and academic audiences. Our research also won 13 awards for its scientific and interdisciplinary impacts.

Engaging Rural Communities

Rural and urban communities experience the burden of firearm injury and violence differently. Our partnerships at Washington State University and Eastern Washington University allow us to include the perspectives and expertise of rural communities to ensure our work is relevant to their context.

Highlights

C-FIP & Policy

Examining Healthcare Professionals' Roles in Extreme Risk Protection Orders (ERPO)

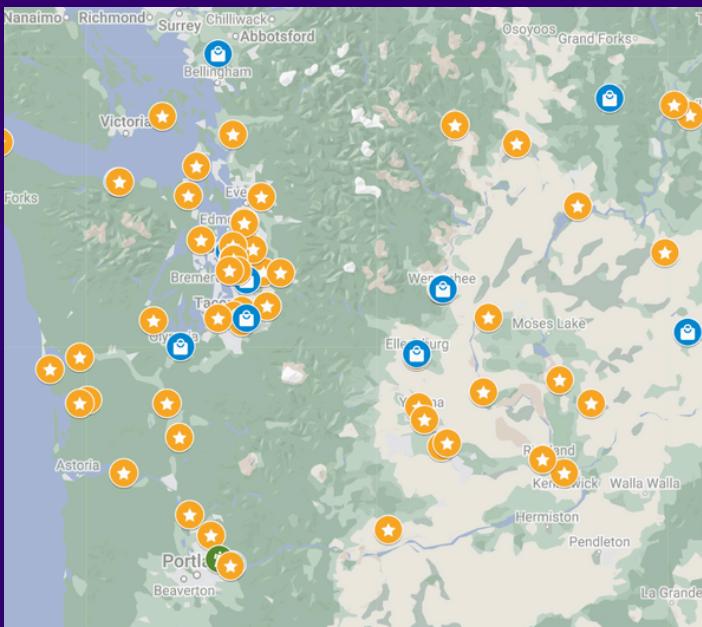

To better understand how ERPOs are being received by healthcare professionals in Washington, we conducted surveys and interviews and analyzed ERPO court documents. While awareness of ERPOs was low among healthcare professionals, many expressed strong interest in recommending them to patients when appropriate. In addition to publishing this work in six peer-reviewed journals, **we developed educational resources, including resource pages, badge tags, and infographics**, to inform healthcare professionals about ERPOs and strategies to reduce firearm access for individuals in crisis.

Understanding the implementation of WA state's domestic violence firearm prohibitions

Supported by the State of Washington, C-FIP researchers evaluated differences in judicial orders to relinquish firearms and other dangerous weapons before and after the implementation of the Regional Domestic Violence Firearms Enforcement Unit (RDVFEU). **RDVFEU implementation was associated with improvements in granted orders to relinquish firearms** and other dangerous weapons, documented respondent compliance, and respondent relinquishment of at least one firearm and/or other dangerous weapon.

Firearm Data & Resources

Washington Firearm Safe Storage Map

This interactive map was made to help people in crisis identify local options for temporary, voluntary firearm storage.

OFSPV Firearm Data Dashboard & Data Inventory

C-FIP partnered with the Office of Firearm Safety and Violence Prevention (OFSVP) to create a data dashboard summarizing the burden of nonfatal and fatal firearm injuries, firearm theft, household firearm access and storage, background checks performed in Washington State, adolescent violence and safety, and juvenile firearms-related offenses, as well as an interactive data inventory of firearm-related data sources at the national, state, and local levels.

Access the data inventory:

Resources for Social Workers to Prevent Firearm-related Harm

With funding from the University of Washington Population Health Initiative, C-FIP members in the School of Social Work created an in-depth document to guide social workers in interacting with their clients about firearm access and risk. They additionally developed badge tags with QR codes to statewide resources on reducing access to firearms for individuals in crisis. Using C-FIP funds made available by Washington State, these will be distributed to social workers statewide at no cost.

Safety Planning to Reduce Firearm Access

What do I need to know?

- Social & medical history
- Past behavior during crisis
- Family & community history of suicide
- Protective factors
- Current & planned access to firearms
- Ability to reduce access

What can I suggest?

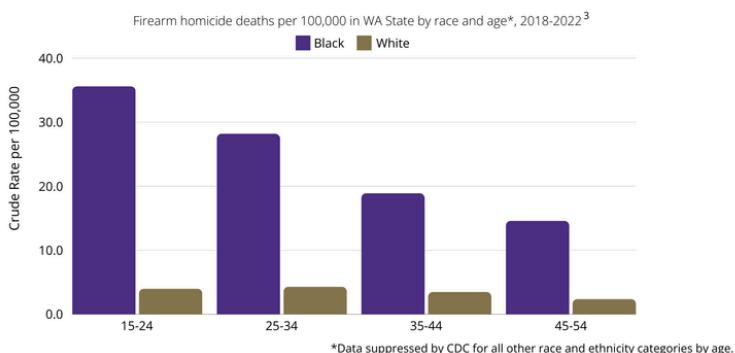

- Lock firearm & ammunition separately
- Store firearms out-of-home
- (VWFR) Voluntary Waiver of Firearm Rights (prohibits firearm purchase)
- (ERPO) Extreme risk protection order (restrict possession and purchase)

Firearms in Washington

Approximately 900 Washingtonians are killed by firearms every year - one death every 10 hours. The majority of firearm-related deaths in the state are due to suicide (70%). However, the burden of firearm injury and violence is felt differently across communities in our state.

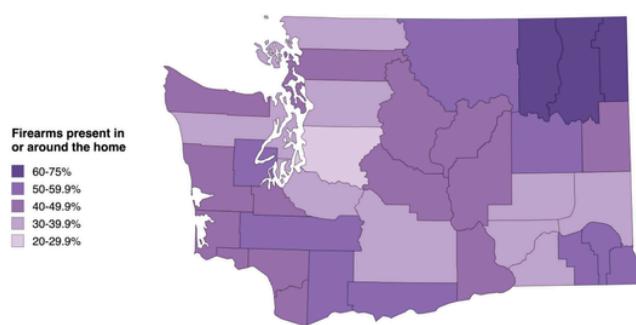

Firearm Deaths in Washington Counties, 2018-2022

➤ In Washington, Black individuals are more likely to die from firearm homicide than White individuals. This disparity is greatest among young men and boys.

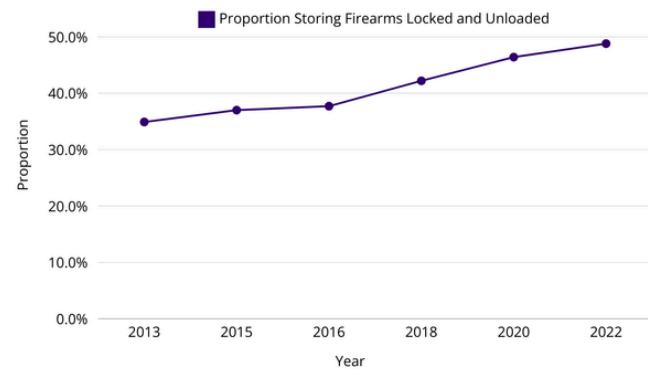

➤ Firearm suicide rates are highest among Black Washingtonians aged 15-34 and White Washingtonians aged 55 and older.

Household Firearm Access in Washington Counties, 2013-2022⁹

➤ Statewide, 42% of households have at least 1 firearm. Rural counties have a greater proportion of households with firearms statewide compared to urban counties.

Household Firearm Storage Practices in WA State, 2013-2022⁹

➤ Secure storage of firearms (i.e. storing them locked and unloaded) is increasing in Washington State. In 2022, almost half of Washington households reporting storing their firearms safely.

About C-FIP

To inform, develop, and evaluate equitable programs, practices, and policies that prevent firearm-related harm.

A vibrant world where all people are safe, healthy, and thriving.

Our Values

1

Humility: Growing with reflection and authenticity

2

Relationship: Acting with respect, kindness, and integrity

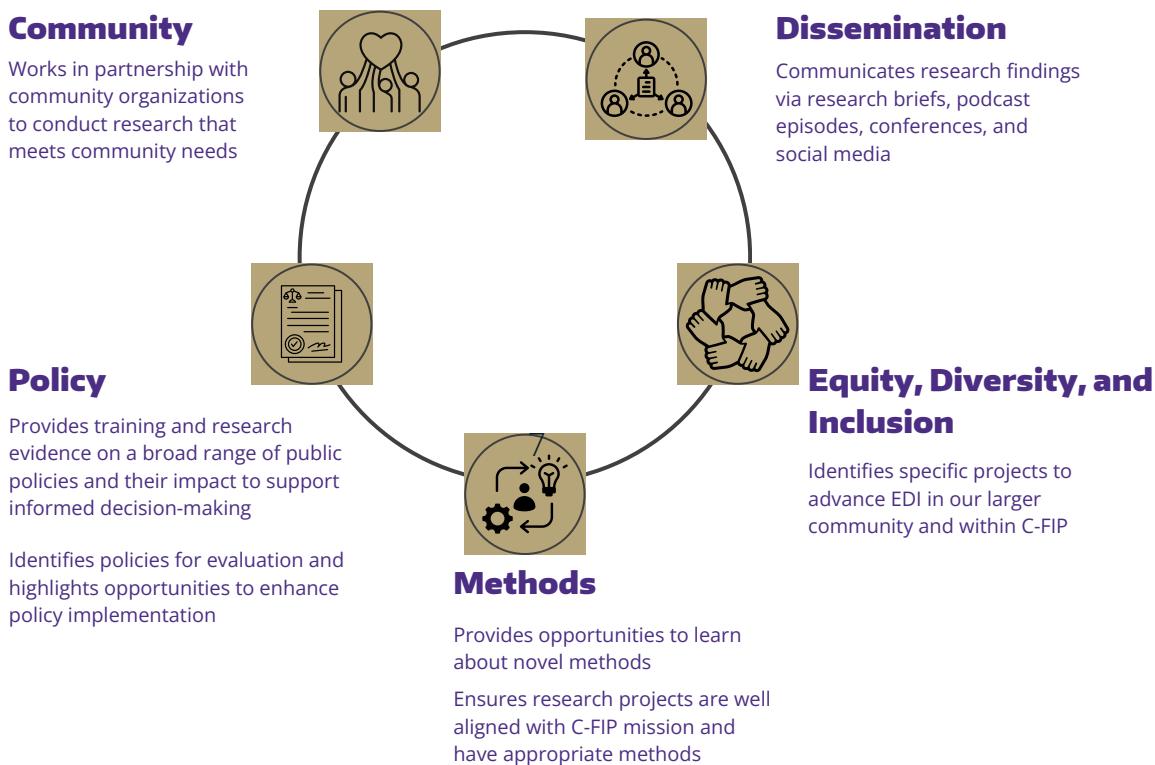

3

Justice: Striving towards equity and healing harms of oppression.

C-FIP Leadership

Internal Teams

C-FIP operated with five teams: Dissemination, Equity, Diversity, and Inclusion, Methods, Policy, and Community. Each team was guided by one or two leaders and focused on specific initiatives in their area. Team Leads met monthly to discuss priorities, plan objectives, and ensure cohesive progress across all teams while remaining aligned with the C-FIP vision, mission, and values.

External Advisory Board

C-FIP also received guidance from members of the External Advisory Board. These are community, academic, and governmental partners who advised us on our work.

- Myesha Watkins, Administrator, *Cuyahoga County Office of Violence Prevention*
- Falana Young, Treasurer, *The Evergreen State Chapter of Parents of Murdered Children (POMC)*
- Michael (Mike) J. Gaffney, Associate Director, *Washington State University*
- Shantel Patu, Executive Director, *Urban Family*
- David Frockt, Former Senator, *46th Legislative District*
- Refujio "Cuco" Rodriguez, Chief Equity and Program Officer, *Hope and Heal Fund*
- Carolyn Thurston, Executive Director, *Dispute Resolution Center of Yakima & Kittitas Counties*
- Marlin Henderson, Program Manager, *REACH Center*
- Michael Brown, Chief Architect, *Civic Commons*
- Sommer Kleweno-Walley, Chief Executive Officer, *Harborview Medical Center*

Our Team

Our team represented 45 individuals in 6 departments across 6 schools who worked alongside community, research, and policy partners to accomplish our shared mission of preventing firearm-related harm.

Training the Next Generation

We view training and mentorship to be one of our most important charges. Our students and trainees are the next generation of leaders, innovators, and changemakers in the field of firearm injury and violence prevention. We take great pride in fostering an environment where curiosity is encouraged and critical thinking is celebrated. Through a combination of hands-on experiences, guided learning, and collaborative projects, we seek to equip our students with the skills they need to excel in their chosen concentrations. Since 2023, we have trained 2 postdoctoral scholars, 8 PhD students, 10 Master's students, and 1 undergraduate student in 5 departments.

- Julie Kafka
- Kristian Jones
- Laura Prater

Student Spotlights

ThuyMi Phung

Recent MPH Graduate, Department of Health Systems and Population Health, University of Washington

"My role at C-FIP has been incredibly meaningful to me, as I am able to connect with an amazing group of people that I get to listen to and learn from, whether it is viewing firearm injuries and deaths through a diversity, equity, and inclusion lens or the new dissemination strategies for firearm research. I have been able to leverage my strengths in marketing to share the incredible work of my colleagues in C-FIP who, like me, are searching for ways to make a difference."

Jacinta Ify Azie, MPH

Recent MPH Graduate, Department of Global Health, University of Washington

"C-FIP played an instrumental role in the completion of my thesis by providing hands-on training, guidance, and support throughout the entire process—from conceptualization and participant recruitment to data analysis. The financial assistance I received from C-FIP was invaluable, enabling me to offer incentives to my study participants, which significantly improved recruitment efforts."

Hiwot Weldelariam, MA, MPH

PhD Student, Department of Epidemiology, University of Washington

Recipient, King County Family Connection mini-grant

"In addition to the opportunity to work with and be mentored by an amazing and talented team from multidisciplinary backgrounds, what draws me to C-FIP is its strong focus on community engagement and its community-centered approach. I firmly believe that community-centered research and interventions are crucial for tackling the gun violence epidemic we are facing in the USA."

Julia Schleimer, MPH

Recent PhD Graduate, Department of Epidemiology, University of Washington

Outstanding Doctoral Student, School of Public Health Awards of Excellence 2024

"Being a part of C-FIP has significantly enhanced my PhD experience. C-FIP has been an intellectual home where I've found incredible mentors and colleagues, been challenged and encouraged to grow, and felt supported as a person and scholar. In my various roles at C-FIP, I've been privileged to help advance the science of firearm injury prevention through specific projects and contribute to how C-FIP as an organization operates. Throughout all my work, it has become abundantly clear that C-FIP is an organization that embodies its values—humility, relationship, and justice—and is a very special place to be."

Postdoctoral Scholar Spotlights

Julie Kafka, PhD, MPH

C-FIP Postdoctoral Scholar (2022-2024)

Assistant Professor, University of Colorado Anschutz Medical Campus

NVDRS New Investigator Award, March 2024

"At C-FIP, I have built connections with colleagues who both supported me as a human and challenged me as a researcher. I started to develop my own portfolio of independent research, and I got involved with projects that I think will have a meaningful impact on how we prevent firearm-related harm. I would not be where I am now, beginning my next step as an Assistant Professor, if it weren't for the time, compassion, funding support, and the leap of faith that C-FIP leaders took when they brought me on."

Kelsey Conrick, PhD, MPH**C-FIP Postdoctoral Scholar**

Recipient, University of Washington Presidential Dissertation Fellowship (2024)
Recipient, Innovation Award, National Research Conference for the Prevention of Firearm-related Harms (2024)

"I am deeply appreciative of the support I've received from C-FIP throughout my time as a PhD student and now as a postdoctoral scholar. C-FIP funding has allowed me to bring on a research assistant to ensure the rigor of my work, compensate social workers who participate in my research, and disseminate the resources I've created for the field. Being part of this community has been invaluable—learning from peers and senior researchers alike and always feeling supported as I continue my training."

Assistant Professor Spotlights

Kristian Jones, PhD

Assistant Professor, Department of Social Work, University of Washington

KL2 award, National Center for Advancing Translational Sciences, Multidisciplinary Clinical Research Career Development Program, March 2024

"Being involved in C-FIP has had a significant impact on my career and has connected me to incredible people in the community I would not have crossed paths with otherwise. I study youth mentoring but have been able to explore the ways in which mentoring can prevent firearm violence, specifically among Black youth and families. This work means a lot to me since I have lost a close friend to interpersonal firearm violence, and working with C-FIP provides the opportunity to honor his legacy."

Jeanie Santularia, PhD, MPH

Assistant Professor, Department of Epidemiology, University of Washington

"C-FIP has given me an academic home full of colleagues who support and challenge me, and care about me as a whole human. My involvement in C-FIP has directly led to my ongoing success in my career."

Alice Ellyson, PhD

Assistant Professor, Department of Pediatrics, University of Washington

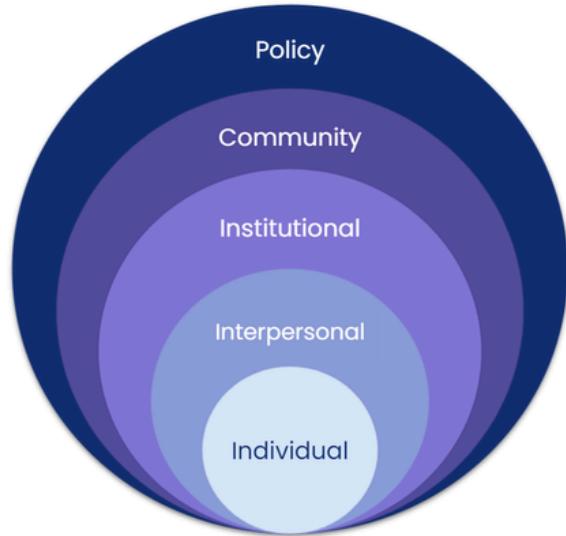

"I have deeply appreciated the collaboration, investment, and advancement that has characterized my involvement in C-FIP since 2019. The support and financial investment from C-FIP led to the publication of 5 peer-reviewed research articles, additional manuscripts under review and ongoing, as well as a research award from the CDC in 2023. I have received outstanding mentorship in C-FIP, and the program has helped me cultivate numerous relationships with scientific and practice partners across WA state."

Our Research

Our Framework

We seek to conduct research that prevents firearm-related harm for communities and individuals, both in Washington and nationally. Our work spans multiple levels—policy, community, institutional, interpersonal, and individual—while addressing disparities that contribute to unequal impacts of firearm violence. By examining these interconnected areas, we seek to develop interventions that create lasting change. Below are some of our ongoing and recently completed research projects, which have received funding from various federal, state and local agencies as well as foundations.

Policy

Domestic Violence Protection Orders

Research led by Dr. Alice Ellyson highlights the risks faced by minors in domestic violence cases. This work identified that **over half of King County's domestic violence protection orders involving minors documented threats or violence**, with firearms present in nearly 25% of cases. Firearms significantly raise the risk of child lethality, being involved in two-thirds of child homicides tied to intimate partner violence. These findings emphasize the need for stronger policies, including firearm relinquishment and better protection measures for children in domestic violence situations (funded by Grandmothers Against Gun Violence).

Community

Firearm safety practices of rural families in Washington state

This project, led by Washington State University researchers Drs. Elizabeth Weybright and Ashley Hall, focused on firearm safety practices within rural Washington communities by **engaging both adolescents and their parents in firearm storage decisions** to prevent injuries and deaths. By involving community members in discussions about firearm culture and safety, the research sought to create tailored, effective prevention programs that address local needs (funded by Grandmothers Against Gun Violence).

Institutional

Behavioral health and criminal legal system interactions of extreme risk protection order respondents

This study, led by Dr. Ali Rowhani-Rahbar, investigated the interactions of individuals subject to extreme risk protection orders (ERPOs) with behavioral health and criminal legal systems. It sought to **identify factors that influence decisions regarding direction into the behavioral health and/or criminal legal system**, while analyzing changes in system encounters before and after respondents receive an ERPO. Using both quantitative and qualitative methods, the study sought to provide a deeper understanding of ERPO implementation. Ultimately, the findings will inform policy changes and judicial decisions to enhance public safety and support respondents' well-being (funded by the National Collaborative on Gun Violence Research).

Interpersonal

School Shootings and Mental Health in the U.S.

The aim of this project, led by Dr. Camerin Rencken, was to understand the mental health impacts of school shootings, one form of interpersonal violence, on those directly and indirectly involved and to inform future research, guide public health interventions, and support advocacy groups and policy makers working to reduce the frequency and impact of school shootings. It employed a mix of qualitative and quantitative methods to **understand the nuances of mental distress following a school shooting** (funded by Grandmothers Against Gun Violence and the Institute for Translational Health Sciences).

Individual

Risk of subsequent firearm-related crime among individuals with prior misdemeanor conviction

The aim of this project, led by Dr. Julia Schleimer and Dr. Ali Rowhani-Rahbar, was to evaluate the risk of arrest and conviction for violent and firearm-related crime in relation to history of firearm and non-firearm-related misdemeanor crimes. Linking administrative data across sources and using quantitative methods, **this study sought to provide contemporary estimates of risk of violent and firearm-related crime among those with prior criminal legal system involvement**. Results will inform programs and policies (such as restricting firearm access, providing supportive services) to reduce risk of harm among those at high risk (funded by the Fund For a Safer Future).

Community-based Partners & Collaborators

Between 2023 and 2025, C-FIP members partnered with 28 organizations across Washington:

- Alliance for Gun Responsibility
- Allies in Healthier Systems for Health and Abundance in Youth (AHSHAY)
- BIPOC Apostrophe
- BRAVE, Seattle YMCA Violence Prevention
- Build2Lead
- Choose 180
- City of Tacoma Neighborhood and Community Services
- Clark County Mediation
- Community Passageways
- Dispute Resolution Center of Grays Harbor and Pacific Counties
- East African Community Services

- Grandmothers Against Gun Violence
- Harborview Medical Center Hospital-Based Violence Intervention Program
- Hummingbird Indigenous Family Services
- Institute for Research and Education to Advance Community Health (IREACH)
- Kaiser Permanente Washington
- King County Prosecuting Attorney's Office
- Office of Firearm Safety and Violence Prevention, Washington State Department of Commerce
- Port of Support & Pathway to Success
- Public Health Seattle & King County
- Resources for Educational Advancement, Careers, and Housing (REACH)
- Regional Domestic Violence Firearms Enforcement Unit
- Regional Peacekeepers Collective King County
- Resilient In Sustaining Empowerment (RISE)
- Seattle Children's Hospital
- Spokane Regional Domestic Violence Coalition (SRDVC)
- Walk About Yakima, Dispute Resolution Center of Yakima
- WSU Extension & 4-H Shooting Sports

WORKING TOGETHER FOR HEALTH EQUITY

Spotlight: Internal Teams

Community Team

Social Impact Evaluation Project

A participatory mixed-methods evaluation of 8 youth firearm violence intervention and prevention programs in Washington state, the Social Impact Evaluation Project was funded by the Washington State Department of Commerce Office of Firearm Safety and Violence Prevention (OFSVP) in 2023-2025.

Creating evaluation tools with current partners funded through OFSVP, including:

- *Spokane Regional Domestic Violence Coalition*
- *Port of Support*
- *East African Community Services*
- *Community Passageways*
- *Walk About Yakima*
- *Harborview Medical Center*
- *Dispute Resolution*
- *Clark County*

Community Outreach

The Community Team compiled quarterly newsletters that were sent to 90 community members across Washington State.

UW Medicine

FIREARM INJURY & POLICY RESEARCH PROGRAM

Community Newsletter

AUGUST 2024

Dear colleagues,

The University of Washington Firearm Injury and Policy Research Program (FIPRP) is committed to sharing timely, actionable information on gun violence prevention with our communities.

Dissemination Team

Research Briefs

The Dissemination Team worked with C-FIP members to develop informative research briefs from their published work. Between July 2023 and June 2025, we created 11 briefs on various topics, including on firearm rights restoration, modeling firearm suicide mortality rates, and evaluating community-based violence interventions.

RESEARCH BRIEF
No. 3: September 2023

FEARARM RESTRICTIONS IN DOMESTIC VIOLENCE PROTECTION ORDERS

Alison M. Elliston, Averi Adria, Sandra Shanahan, Aisha Alsinai, Lisa DiMascio, Maximilien Reugels, Deridre Bowen, Ali Rowhani-Rahbar

Brief prepared by: Erik Morts

Domestic violence is a substantial public health and safety problem, and firearms increase risk of harm for victim-survivors, their family members, and the community. Federal law prohibits individuals who are subject to domestic violence protection orders (DVPOs) from possessing or purchasing firearms, but there is no mechanism to enforce this federal law. Many states have enacted laws authorizing or mandating judges to require firearm relinquishment, but actual implementation and enforcement of these state-level laws varies.

THE STUDY

This study evaluated and quantified the implementation of Washington State's DVPO-related firearm prohibition law by the Regional Domestic Violence Firearms Enforcement Unit (RDVFEU), which was designed to help facilitate firearm and weapon surrender compliance among individuals subject to DVPOs (i.e., respondents), in King County, WA.

MAIN OUTCOMES

Researchers estimated the association between implementation of the RDVFEU and three outcomes:

1. Judicial orders to surrender weapons and firearms granted as part of the DVPO
2. Documented compliance among respondents ordered to surrender weapons and firearms
3. Firearm and/or weapon relinquishment by respondents ordered to surrender weapons and firearms

**FOR ADDITIONAL INFORMATION ON THIS TOPIC
PLEASE REFER TO:**

Elliston, A. M., Adria, A., Shanahan, S., Alsinai, A., DiMascio, L., Reugels, M., Bowen, D., & Rowhani-Rahbar, A. (2023). Firearm restrictions on domestic violence protection orders: implementation, vetting, compliance, and enforcement. *Journal of Traumatic Stress*, 36(1), 1-10. <https://doi.org/10.1111/jts.13439>

FUNDING INFORMATION

This work was supported by contracts from the State of Washington for firearm-related research.

FIREARM INJURY & POLICY RESEARCH PROGRAM
UW Medicine

FINDINGS

About 22% of DVPO petitioners reported respondent access to or ownership of firearms, and 36% of DVPO petitioners indicated the respondent used a firearm, weapon, or object to threaten or harm them. The RDVFEU helps bridge important gaps by vetting firearms access/ownership and sharing this information with victim-survivors to enable more accurate safety planning and with law enforcement to help promote public and first-responder safety.

Benefits of RDVFEU Implementation

RDVFEU implementation was associated with three important outcomes:

- Court orders to surrender weapons and firearms
- Respondent documentation of compliance with court orders to surrender weapons and firearms
- Respondent relinquishment of at least one firearm and/or other dangerous weapon

Compared to DVPOs granted prior to RDVFEU implementation, granted DVPOs after RDVFEU implementation were at least 4.5 times more likely to include an OJSW. RDVFEU implementation was also associated with 3.4 times the odds of respondent documentation of compliance, and 3.2 times the odds of respondent relinquishment of at least one firearm and/or other dangerous weapon. These findings demonstrate RDVFEU implementation was associated with benefits at each stage of the protection order process with improvements in both judicial enforcement and respondent compliance.

IMPLICATIONS FOR POLICY AND PRACTICE

01 Evaluate whether approaches relying heavily on those in the legal system (e.g., judges, police, attorneys) like the RDVFEU is an effective and equitable way to implement DVPO-related firearm restrictions.

02 Clarify when an order to surrender weapons is mandatory, who is responsible for vetting firearm access and enforcing prohibitions, and how individuals subject to these orders should comply.

03 Establish a firearm information vetting process to assess firearm access among individuals subject to domestic violence protection orders.

04 Improve firearm purchase records to help facilitate firearm access vetting.

05 Incorporate judicial education into policy as a part of robust practice given improvements in court officer compliance with the law after RDVFEU implementation.

C-FIP Podcast

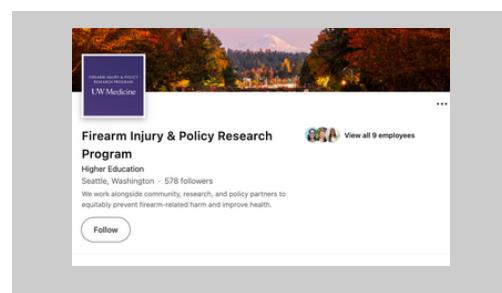

The C-FIP Podcast launched in January 2024 and as of June 2025, we released 14 episodes. Hosted by Dr. Fred Rivara, each brief 10 to 15-minute episode highlighted recent work by C-FIP members, including relevance to the scientific and greater Washington community. Tune in here:

Social Media

The Dissemination Team creates and shares content related to C-FIP members' work, including new publications, member spotlights, research briefs, podcast episodes, events, and presentations. As of June 2025, we have amassed 775 followers and 63,000 impressions on LinkedIn.

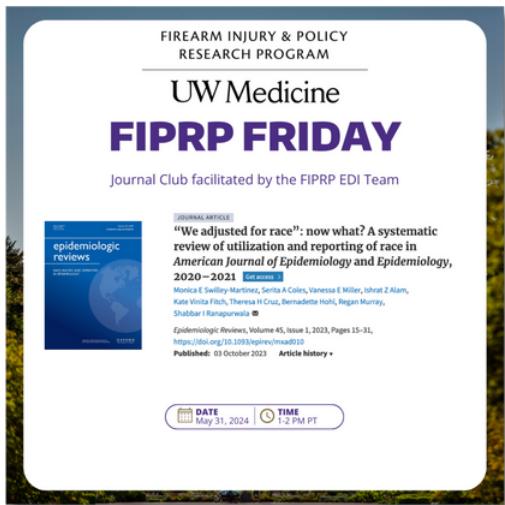

Equity, Diversity, and Inclusion (EDI) Team

Mission

The mission of the EDI team is to **create a safe space within C-FIP** dedicated to the **pursuit of equity, diversity and inclusion** in firearm injury prevention research.

Journal Clubs

Central to the mission of the EDI team is leading conversations on how to critically consider the use of race and ethnicity as variables in our research. In May 2024, the EDI team hosted a journal club on a systematic review of utilization and reporting of race in epidemiology by Swilley-Martinez, et al. In breakout rooms, members of the EDI team led discussions on the strengths and limitations of the article with 41 C-FIP team members on the ways in which they have included race and ethnicity in their own research.

Policy Team

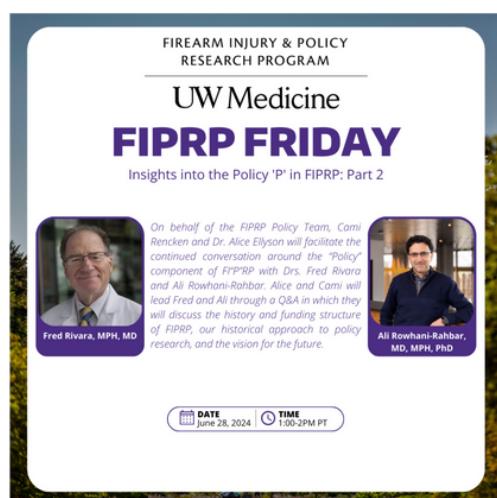

Mission

The Policy Team provided training and research evidence on a broad range of public policies and their impact to **support evidence-informed decision making**. Additionally, they identified policies for evaluation and **highlighted opportunities to enhance policy evaluation**.

Activities

This biennium, the policy team has:

- Produced a podcast on C-FIP's policy engagement history and future vision
- Invited UW experts to discuss the university's relationship with policymakers and how to best leverage our work for policy uptake
- Planned a speaker series to learn from experts on navigating policy research

Methods Team

Mission

The Methods team supported rigorous, theoretically informed, and community-engaged C-FIP research that contributes to reducing firearm-related harm and promoting public health and social justice. We:

- Provided qualitative, quantitative, and mixed methods consultation services to C-FIP members
- Created, compiled, and presented methods resources to C-FIP members
- Developed ethical and methodological guidelines for C-FIP research

Activities

Our team has hosted 22 Methods Seminars since July 2023. Honoraria from C-FIP funds have allowed us to learn from nationally renowned researchers. Some seminars have included:

Positionality for Epidemiologists: Exploring the Role of our Social Identities in Quantitative Research

Jen Cruz, MPH

*Doctoral Candidate, Department of Social and Behavioral Sciences
Harvard T. H. Chan School of Public Health*

Leveraging Participatory Methods in Firearm-Related Injury Prevention Research

Krista Mehari, PhD

*Assistant Professor, Department of Psychology and Human Development
Peabody College, Vanderbilt University*

Talib Hudson, PhD

*Founder, The New Hood
Director of Research, National Network for Safe Communities,
John Jay College
Operations Director, Black & Brown Collective*

Spotlight: Events

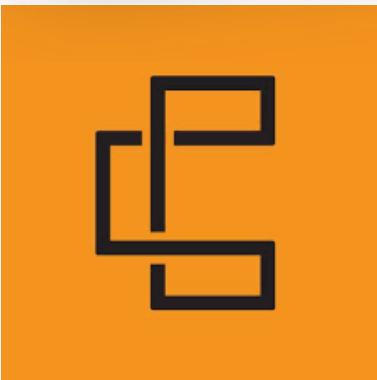

C-FIP Fridays

C-FIP Fridays are an opportunity for the team to connect and learn from each other and the communities we serve. We met monthly to host journal clubs, panels from community organizations, or presentations from community leaders. Some of our past C-FIP Friday events have included:

Jimmy Brown, Build2Lead

Build 2 Lead works to empower, engage, and educate young people so they can interact with and advocate to change the systems that historically limit them. Mr. Brown discussed his vision for how Build2Lead and C-FIP can work together to address firearm violence in South King County.

Cities United

Cities United joined C-FIP in a panel highlighting the experience of alumni as young leaders in the work, their thoughts on the value of a public health approach to violence prevention, and how the CU Young Leader Fellowship has added to their work and approach as leaders in the field.

Lynniah Grayson, RISE

RISE is dedicated to supporting families impacted by gun violence in Seattle and surrounding cities. Ms. Grayson, RISE founder and C-FIP member, shared with our team how RISE brings this vision to life through programs such as mental health services, childcare, and education.

Conferences

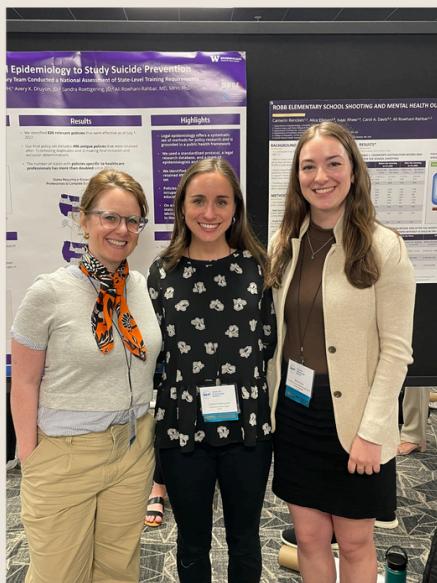

Central to C-FIP's mission--to inform, develop, and evaluate equitable programs, practices, and policies that prevent firearm related harm--is dissemination of our work to diverse audiences. Between July 2023 and June 2025, C-FIP team members attended 18 academic and community conferences, and gave 99 presentations. Some conferences and presentations include:

C-FIP Team
Society for the Advancement of Violence and Injury Research, April 2024

Lynniah Grayson, Meron Girma, and Dr. Kristian Jones
Giffords Community Violence Intervention Conference, June 2024

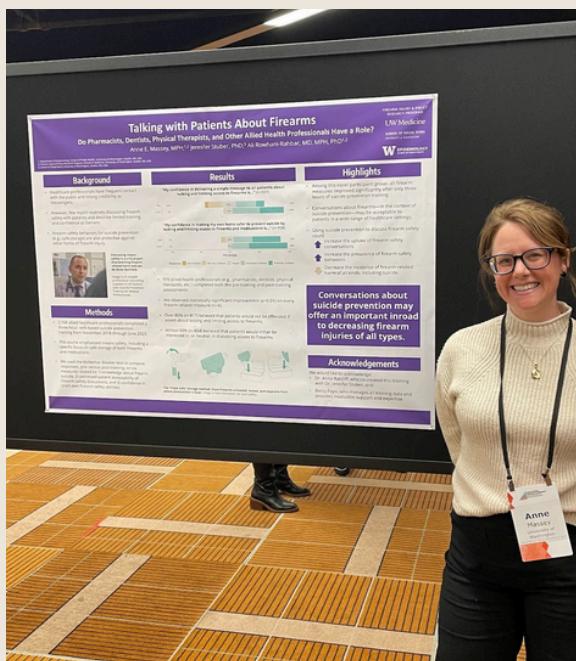

Dr. Anne Massey, Dr. Camerin Rencken, and Nicole Asa
Society for Epidemiologic Research, June 2024

C-FIP Team
Society for the Advancement of Violence and Injury Research, April 2025

C-FIP Team

National Research Conference for the Prevention of Firearm-related Harms, November 2023

C-FIP Team

National Research Conference for the Prevention of Firearm-related Harms, December 2024

Webinars, Panels & Presentations

C-FIP team members are often asked to give presentations to community and academic groups and serve on expert panels. Between July 2023 and June 2025, our team gave 45 presentations and webinars, including:

Dr. Julie Kafka

Intimate Partner Violence and Subsequent Violent Deaths
National Collaborative on Gun Violence Research, June 2024

Dr. Kristian Jones

Uncovering the Precursors of Change:
 Examining Cross-Racial Youth
 Mentoring Relationships Between
 Non-Black Mentors and Black Youth
Center for Studies in Demography & Ecology, October 2023

Dr. Ali Rowhani-Rahbar

Evidence-Driven Approaches to Preventing Firearm Deaths
Penn LDI Webinar, May 2024

Drs. Camerin Rencken, Julie Kafka and Ali Rowhani-Rahbar
 Research to Action: Exploring the Gaps
Grandmothers Against Gun Violence, September 2024

Dr. Kelsey Conrick

Strategies, Resources, and Policies for
 Social Workers to Reduce the Risk of
 Firearm Injuries and Deaths
*Fred Hutchinson Cancer Center Social
 Workers, August 2023*

Internal Community Building

Our Community Team strives to find opportunities for our growing team to connect in person. We come together to celebrate our achievements, share our challenges, and build stronger bonds to ensure everyone feels valued and supported. Each event is designed to nurture collaboration and camaraderie, ensuring that our team remains united and motivated to achieve our common goals.

C-FIP Summer Picnic
July 2023

November 2023

C-FIP Holiday Party
December 2023

Gun Violence Awareness Month
June 2024

C-FIP Dinner in Seattle, WA
December 2024

C-FIP Celebration
June 2025

Vision for our Future

-  Answer research questions of interest to our partners & policymakers
-  Monitor trends and burden of firearm-related harm
-  Initiate county and statewide campaigns
-  Invest in new partnerships locally, regionally, and nationally
-  Create new resources and build capacity
-  Train the next generation of researchers, practitioners, and leaders

Nicole Asa	Poverty-reduction effort linked to lower gun suicide rate	UW Medicine Newsroom

Honors & Awards, July 2023 - June 2025

C-FIP members have received 17 honors and awards from conferences, within their departments, in leadership education programs, and from national organizations. These included:

Ali Rowhani-Rahbar, MD, PhD, MPH

- Elected to the National Academy of Medicine
- Elected to the WA State Academy of Sciences

Anne Massey, PhD, MPH

- Multidisciplinary Science Award Science Award, 2023 National Research Conference for the Prevention of Firearm-related Harms
- Recipient, Bonderman Travel Fellowship

Laura Prater, PhD, MPH, MHA

- Multidisciplinary Science Award, 2023 National Research Conference for the Prevention of Firearm-related Harms

Pictured from left to right: Laura Prater, Ali Rowhani-Rahbar, and Anne Massey

Cameren Rencken, PhD, ScM

- Student Scholar and Travel Scholarship Recipient, World Conference on Injury Prevention & Safety Promotion

Madeline Fodor presenting for Elizabeth Weybright's awarded abstract

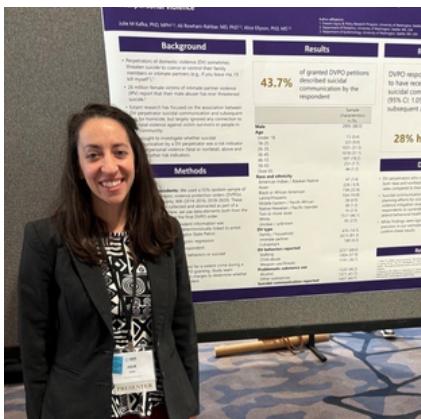

Elizabeth Weybright, PhD, MS

- Abstract of Distinction, Society for Prevention Research

Fred Rivara, MD, MPH

- Excellence in Violence & Injury Prevention Science Award, Society for the Advancement of Violence & Injury Research (SAVIR)
- Distinguished Alumnus Award, University of Pennsylvania School of Medicine

Julie Kafka, PhD, MPH

- NVDRS New Investigator Research Award, American Public Health Association (APHA)

Julia Schleimer, PhD, MPH

- Outstanding Doctoral Student, University of Washington Department of Epidemiology
- Jess Kraus Award, Injury Epidemiology

Kelsey Conrick, PhD, MPH

- Innovation Award, 2024 National Research Conference for the Prevention of Firearm-Related Harms

Kristian Jones, PhD

- BASW Students' Choice Teaching Award, University of Washington School of Social Work
- The Synergy Seeder Award, University of Washington School of Social Work
- Institute of Translational Health Sciences KL2 Scholar

Lynniah Grayson

- CVI Leadership Academy delegate for WA State, The University of Chicago Crime Lab
